AI Note-Taking for Interviews

When you take part in your first-round interview with our Talent Acquisition team, we may use Metaview, an AI-powered note-taking tool, to help your recruiter focus on the conversation rather than typing notes.

What Metaview Does

Metaview automatically captures your conversation so the recruiter can prepare accurate notes. It does not make hiring decisions, score candidates, or replace human judgement. This is simply a tool that helps recruiters focus on you, the candidate.

What Information Is Processed

If you decide to opt in, the tool records your interview conversation, including:

- Audio of your screening call
- Transcripts of the discussion

No automated decisions are made about you.

What's Our Legal Basis

We rely on our Legitimate Interest for this - our goal is to make the recruitment process better for candidates, by allowing our recruiting team to focus on you during the interview.

We will not use Metaview unless you have actively opted-in.

Who Has Access

Only authorised members of our Talent Acquisition team and relevant hiring stakeholders may view the summaries.

Metaview acts as our data processor under a contractual agreement that ensures your data is handled securely and in line with the GDPR and our [Privacy Notice](#).

Where Your Data Is Stored

Metaview stores and processes data within the EEA or under appropriate safeguards (such as adequacy decisions or Standard Contractual Clauses) for any transfers outside the EEA.

How Long We Keep It

Interview recordings and summaries are kept only as long as necessary for the recruitment process, usually up to 5 years, after which they are securely deleted.

Your Choices

Use of Metaview is completely optional.

We will ask for your permission before using it, this will not affect your candidacy in any way.

Want To Know More?

You can reach out to dpo@riotgames.com if you'd like more information about how we handle your data or to exercise your rights under the GDPR.
